Professional Summary

Analytical and results-oriented **Senior Data Engineer** with **6.7** years of expertise in architecting large-scale ETL/ELT pipelines and data solutions. **Databricks Certified Data Engineer Associate** with specialized proficiency in the **Azure Data Engineering** ecosystem with **Databricks, Azure data factory, PySpark, SparkSQL and Snowflake**. Demonstrated success within the Amdocs Data and Intelligence Unit, orchestrating the transformation of intricate telecom BSS/OSS data into high-value Lakehouse insights. Proficient in implementing **Delta Live Tables (DLT) pipelines** for **batch** and **streaming** ingestion, including leveraging **DLT Autoloader** for working with real-time data from sources such as **Oracle GoldenGate, Azure Event Hub, and Kafka**. Skilled in optimizing high-performance queries, while delivering complex technical projects under Agile methodologies in international, customer-facing environments. Experience in working with **Unity Catalog** in Databricks.

Skills

- **Primary Skills:** Azure Data Engineering, Databricks, Azure Data Factory (ADF), PySpark, SparkSQL, SQL, Python, Delta Lake, Snowflake, Azure Cloud Platform
- **Secondary Skills:** Oracle SQL, Linux, JIRA, Confluence, Data Modeling, Requirement Gathering

Certifications

- [Databricks Certified Data Engineer Associate \(2025 - 2027\)](#)
- [Databricks Lakehouse Fundamentals \(2024 - 2025\)](#)

Professional Experience

Amdocs | 2019 – Present

Senior Data Engineer | Official Title: Business Analyst | 2024 – Present

System Analyst | 2019 – 2024

- Lead ELT pipeline design and implementation for telecom clients, orchestrating data movement from BSS/OSS applications to a unified Databricks Lakehouse.
- Architected Cloud Delta Lakehouse solutions using logical data models, integrating with Snowflake DWH using databricks and Azure data factory to support critical business analysis and BI workloads.
- Managed complex data transformations and workflows using Databricks notebooks and Delta Live Tables to process reference and transactional telecom data.
- Designed and maintained specialized data marts and presentation layers for stakeholders including Adobe, Salesforce, Equinity, Affiliate partners and Medallia.
- Handled massive volumes of streaming and batch telecom data using Photon-enabled Databricks clusters, achieving high-speed data aggregation and seamless integration with the downstream Snowflake DWH.
- Successfully navigated high-pressure environments during critical technical and commercial go-lives **on-site in London, UK**, ensuring 100% data pipeline stability and zero downtime for high-volume telecom workloads.

Education

- **PG Diploma in Advance Computing (DAC)** | CDAC Pune | 2019 (Grade: 73.30%)
- **Bachelor of Engineering: Information Technology** | S.P.P.U. (Pune University) | 2018 (Grade: 67.93%)
